ZEYAD YASSER ABDALLAH OWEIS

IT Technical Support Team Leader | Multi-Branch IT Operations | System Administration | Database Fundamentals

+20 102 447 4059 | zeyady2233@gmail.com | Beni Suef, Egypt | LinkedIn: linkedin.com/in/zeyad-yasser-213312297 | GitHub: github.com/zeyad4a

PROFESSIONAL SUMMARY

IT Technical Support Team Leader with hands-on experience leading multi-branch IT operations for Gamma Scan Center, supporting medical imaging environments, administering servers, stabilizing networks, and delivering reliable technical support across daily business operations. Experienced in wireless branch connectivity, server and backup administration, printers, surveillance, access control, hardware troubleshooting, and database fundamentals. Basic programming background with focus on practical IT operations, systems reliability, and fast issue resolution.

CAREER HIGHLIGHTS

- Manage IT operations for 4 Gamma Scan Center branches: Beni Suef El Zeraeyeen, Beni Suef Salah Salem, El Fashn, and Al-Khulafa Al-Rashideen Hospital branch in Cairo.
- Built and configured stable point-to-point connectivity between the two Beni Suef branches using NanoStation and PowerBeam devices.
- Rebuilt, organized, and stabilized the main branch network from the ground up, improving reliability, efficiency, and daily operational readiness.
- Administer 4 core servers, including print server, Millensys system server, Veeam backup server, and database server.
- Digitized Al Marwa Hotel & Restaurant operations by implementing an IT system that moved daily workflows from paper-based processes to digital work.

CORE SKILLS

IT Operations: Multi-branch IT support, technical support leadership, incident handling, vendor coordination, documentation
Networking: Network setup and troubleshooting, switching basics, wireless point-to-point links, NanoStation, PowerBeam, printers, access points
Systems & Servers: Windows systems, print server, Millensys system server, Veeam backup server, database server support, backup monitoring
Medical IT: Radiology environment support, MRI/CT/X-ray workstation support, Toshiba and Siemens vendor coordination
Database Knowledge: Database fundamentals, MySQL, SQL basics, data organization, backup awareness, database server support
Programming Exposure: Basic practical background in PHP, HTML, CSS, JavaScript, Python, C++, and Java
Soft Skills: Team leadership, problem solving, communication, time management, research, user training

PROFESSIONAL EXPERIENCE

IT Technical Support Team Leader | Gamma Scan Center | Beni Suef & Cairo, Egypt | 2023 - Present

- Lead IT operations and support across 4 branches: Beni Suef El Zeraeyeen, Beni Suef Salah Salem, El Fashn, and Al-Khulafa Al-Rashideen Hospital branch in Cairo.
- Designed, installed, and configured the wireless link between the two Beni Suef branches using NanoStation and PowerBeam devices, ensuring stable communication between locations.
- Rebuilt and handled the full main branch network, including network organization, device setup, troubleshooting, and stability improvements.
- Administer and support 4 servers: print server, Millensys system server, Veeam backup server, and database server.
- Maintain networks, printers, workstations, surveillance systems, access control systems, and daily branch IT services.
- Support radiology devices and medical imaging environments, including MRI, CT, and X-ray systems, with vendor coordination for Toshiba and Siemens systems.
- Troubleshoot hardware, software, connectivity, server, and business-system issues to reduce downtime and maintain smooth branch operations.

System Administrator / IT Support | Al Marwa Hotel & Restaurant | Beni Suef, Egypt | 2023 - 2024

- Designed and implemented the hotel IT system, converting paper-based workflows into a digital operational process.
- Provided IT support for hotel and restaurant operations, including users, devices, network connectivity, and daily system issues.
- Configured and maintained network and reservation-related systems to support front-desk and operational workflows.
- Trained staff on system usage, digital procedures, and basic troubleshooting to improve adoption and reduce manual work.

INTERNSHIPS & TRAINING

Machine Learning Trainee | Beni Suef Technological University | Beni Suef, Egypt

- Completed introductory training in machine learning and data science concepts.

Visual Basic Project Trainee | Al-Azhar Organization | Beni Suef, Egypt | 2 Months

- Developed a Visual Basic project and received recognition for excellence.

IT Infrastructure Trainee | Drinking Water & Sanitation Company | Beni Suef, Egypt | 2 Months

- Gained practical exposure to data center layouts, switching systems, and network configuration concepts.

EDUCATION

Bachelor's Degree in IT - Software Specialization | Graduated: 2026

Beni Suef Technological University, Egyptian College of Industry & Energy Technology - Egypt
